DETAILED ACTION

Papers Received

Receipt is acknowledged of the applicant's amendment, response, and petition for extension of time, all received on 25 May 2006

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

The rejection of Claims 3-16 and 23-25 under 35 U.S.C. 103(a) as being unpatentable over Winston *et al.* (U.S. Patent No. 4,623,536) is maintained.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 3-16 and 23-25 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In Claims 3 and 14, the newly introduced term "flowable" is a relative term that is not sufficiently defined in the instant specification. The does not appear to be any clearly stated set of objective criteria within the instant application that defines "flowable" in terms of ranges of

Art Unit: 1618

viscosities or in terms of aqueous content. As such, this term renders the rejected claims indefinite.

Response to Arguments

Applicant's arguments with respect to the instant claims have been considered but are not considered to be persuasive. The present amendment further describes the instantly claimed invention as a flowable slurry. However, in the view of the examiner, this is not sufficient to patentably distinguish from the disclosure of the prior art. In the view of the examiner, the applicant cannot persuasively distinguish the instantly claimed invention from the prior art using only functional limitations, where the prior art has disclosed the recited components of the instantly claimed invention. Further limitations that define the instantly claimed compositions in terms of a more precise recitation of components or in terms of limitations that clearly recite a patentably distinct structural difference should be introduced, which would necessarily result in any newly recited functional features, in order to truly patentably distinguish over the prior art.

The applicant has not introduced such claim limitations, relying only on the introduction of a relative term that is not clearly defined, such that the prior art still discloses the recited components of the instantly claimed compositions, thereby obviating them. As such, the examiner must continue to reject the pending claims.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
